GNOSTIC ANTHROPOLOGY 6

THE ORIGIN OF THE SEXES

SAMAEL AUN WEOR

INTRODUCTION

Within the collection of talks Samael, those related to the Gnostic Anthropology is seven and are the result of a singular work, as part of a sequence that made it possible to shape a unitary work in its thematic whole, integrated seven chapters, which is why they are presented in the same format. By uniting all topics covered will discover that in addition to being a unique work, they have not become obsolete, despite the time elapsed.

SECTION 1

1977

Six talk

THE ORIGIN OF THE SEXES

The origin of the sexes, the passage of androgynous or hermaphrodite, the fissiparous reproduction, sexual reproduction cooperation, Vishnu Purana, glaciations, Atlantis, Lemuria.

Well, we will begin our lecture tonight. Unquestionably terrestrial humanity has gone through various phases of development, and this is something we should analyze judiciously.

There is talk of mechanical evolution of nature, man and the cosmos. From the anthropological point of view, we have to understand that there are two kinds of evolution: the first would begin obviously with sexual cooperation properly within each and every one of its aspects; the second is different ...

Unquestionably, at principle the human race multiplied in the same way cells multiply. We know that the core is divided into two within the living cell, and that specializes a certain amount of inherent cytoplasm and materials to form new cells. The two are divided, in turn, in two others, and thus through the fissiparous process, we would say, cell division, organisms develop, cells multiply, etc.

If at first the androgynous were divided into two, or three individuals to reproduce later that all changed and had to prepare the body to reproduce subsequently by sexual cooperation. Obviously, it was in Lemuria, a continent once located in the Indian Ocean, there the main aspects related to reproduction were performed.

In principle the creative organs, the lingam-yoni, it was not yet fully developed. It was necessary that these organs of the species completely crystallized and conducted, so later in time could be done, specifically, the reproduction of the human species through sexual cooperation.

So, as these (male-female) organs were developed, we not merely say in the androgynous human being, but Hermaphrodite, rather interesting events occurred from the biological point of view and psychosomatic.

The fertilizer cell, for example, could make contact with the egg, and thus, such "cell-atom" appeared from the body of Father-Mother to develop and unfold. As a consequence or corollary, with very delicate processes, then was born a new creature.

The second aspect of this issue was also quite interesting. While it is true that in principle, living germs came off as atomic radiation to develop outwardly and become new creatures, in the second there was some favorable change. Arguably the fertilized egg, the egg females normally removed from her ovaries every month, had some extraordinary consistency, was already an egg itself, in its intrinsic constitution; a fertilized internally within the Father-Mother, within the Hermaphrodite, an egg leaving the outside world could cope or incubated egg, until finally opened for a creature emerged from there; creature that fed on the breasts of the Father-Mother, and this, in itself, is already quite interesting.

Much later in time, he was being noted that certain creatures came into existence with an organ more developed than another. At last came the time when humanity was divided into opposite sexes. When this happened, when it happened, then the sexual cooperation was needed to create.

The genealogies of Haeckel, regarding the possible origin of man and our three primary races, and that do not fit within this Materialistic anthropology today which invades the world, alas, are indeed the laughing stock of the materialistic anthropologists, enemies what divinal.

They mock alike, both the genealogy of Haeckel, or pedigrees, to speak in the plural, as those lineages of Homer. You remember, clearly, Achilles, the famous warrior son of Mars, Agamemnon, son of Jupiter, from afar commands, etc.

Phrases or poetic words of the man who sang at other times, ancient Troy and the rage of Achilles, the warrior ...

We need to talk very clear in all these anthropological questions, obviously. Scientists at this time pay attention to Paracelsus, the father of chemistry, or the SOZURO Haeckel, the famous mythological Sozuro. In any event, there is much we have to analyze and investigate exclusively within the anthropological.

If the division of the living primitive or primordial cell refused the reproductive process, would also decline the reproduction of Moneron or the atom of the watery abyss of Haeckel, dividing itself to multiply.

Science, in truth, in some way could decide, scientifically, against that original reproduction system by cell division, ie by fissiparous act.

However we realize clearly that these exposed theories on how to begin the reproduction (either through sexual cooperation, or that other, in which organs creators should be developed before starting the possible cooperation) They are very controversial and thorny.

All religious theologies, from the Orphic (which is quite ancient) to the Christian Bible, tells us of a beginning by sexual cooperation. It is rather symbolic; could be repeated in charge of Alchemy, but not scientific-anthropological, because it could not start an evolutionary process with sexual cooperation, clearly, when the bodies creators still have not been created.

Obviously, there must have been a period of preparation for reproduction through cooperation, a period during the organs creators had to develop and function in human organic physiology.

Religious scriptures, both East and West, have been altered, except the Visnu Purana, for example, where it is said that "Daxa, after giving humans the ability to reproduce through cooperation, said: "long before that humans could have that ability, long before sexual cooperation between men and women existed, there were other modes of reproduction '." It concerns prior to the formation of the creative organs in humans stages.

I not reach the degree of stating emphatically that those previous cooperation, systems or lacked did not have any relationship with the creative energy. I think the sexual energy has other forms of manifestation, and before the creative organs in the human species had evolved, sexual energy had other modes of expression to create.

It is a pity that the Scriptures of all religions have been adulterated. We know that even the ESDRAS altered a bit the Pentateuch in the Hebrew Bible. But among all these issues, it is essential that we continue analyzing and reflecting ...

Where the different races are unwrapped? We have said many times that the NEO PITHECOIDE is quite absurd, like his CYNO-CEPHALO with tail, "tailless monkey" and "man-tree" issues simple utopias that have no foundations of any kind and we laughed a lot about the mythical SOZURO Haeckel and that kind of "monkey" with speak capacity, something like the missing link between ape and man.

But it is necessary to know where these breeds have been developed, in which scenario they have operated these evolutions and involutions of humanity. That's what we really need to know; because it would be impossible to separate human races of their environment, their different continents, its islands, its mountains, its natural scenery.

It is amazing that even though there were huge reptiles in the Mesozoic, humanity still alive while those already disappeared from the face of the Earth. How is it possible that all antediluvian monsters have perished and that humanity is still living? We have put a lot of emphasis on that issue, and we need to think a little or much...

That the human being is related to its environment, it is something that can not be denied. That have been other ways other than sexual reproduction cooperation, it is also undeniable. But we should know something about every environment where different races developed; It urges, little by little, we study the various scenarios of Nature.

We do not deny that there are facts that astronomers do not know. What do they know, for example, on changes or modifications to the axis of the Earth in relation to the obliquity of the ecliptic?

Laplace, the one who invented his famous theory that today exists, stating that "all worlds came out of their corresponding nebulae", a fact that has never been proven, goes so far as to tell us, fanatically, that "the decline of the Earth's axis in relation precisely with the obliquity of the ecliptic, it is almost nil, and that this has always been a secular way."

Geology, is against of these concepts of astronomy. Of course axis deviation of the Earth within the obliquity of the ecliptic, or inclination, to be clearer, involves periods, were, glacial which always happen through the ages.

If we deny glacial periods, we would be saying absurd things, because glaciations are fully demonstrated and are based precisely on the deviation of the axis of the Earth in its inclination within the obliquity of the ecliptic.

So it is demonstrated, quite clearly through geological studies, such a relationship that deny astronomers. Geology and Astronomy are therefore opposed in this issue [1970's]. There is evidence of tremendous glaciations. MAGELLAN already noted certain times of unusual heat in the Arctic, accompanied simultaneously glaciations and intense cold in the Antarctic.

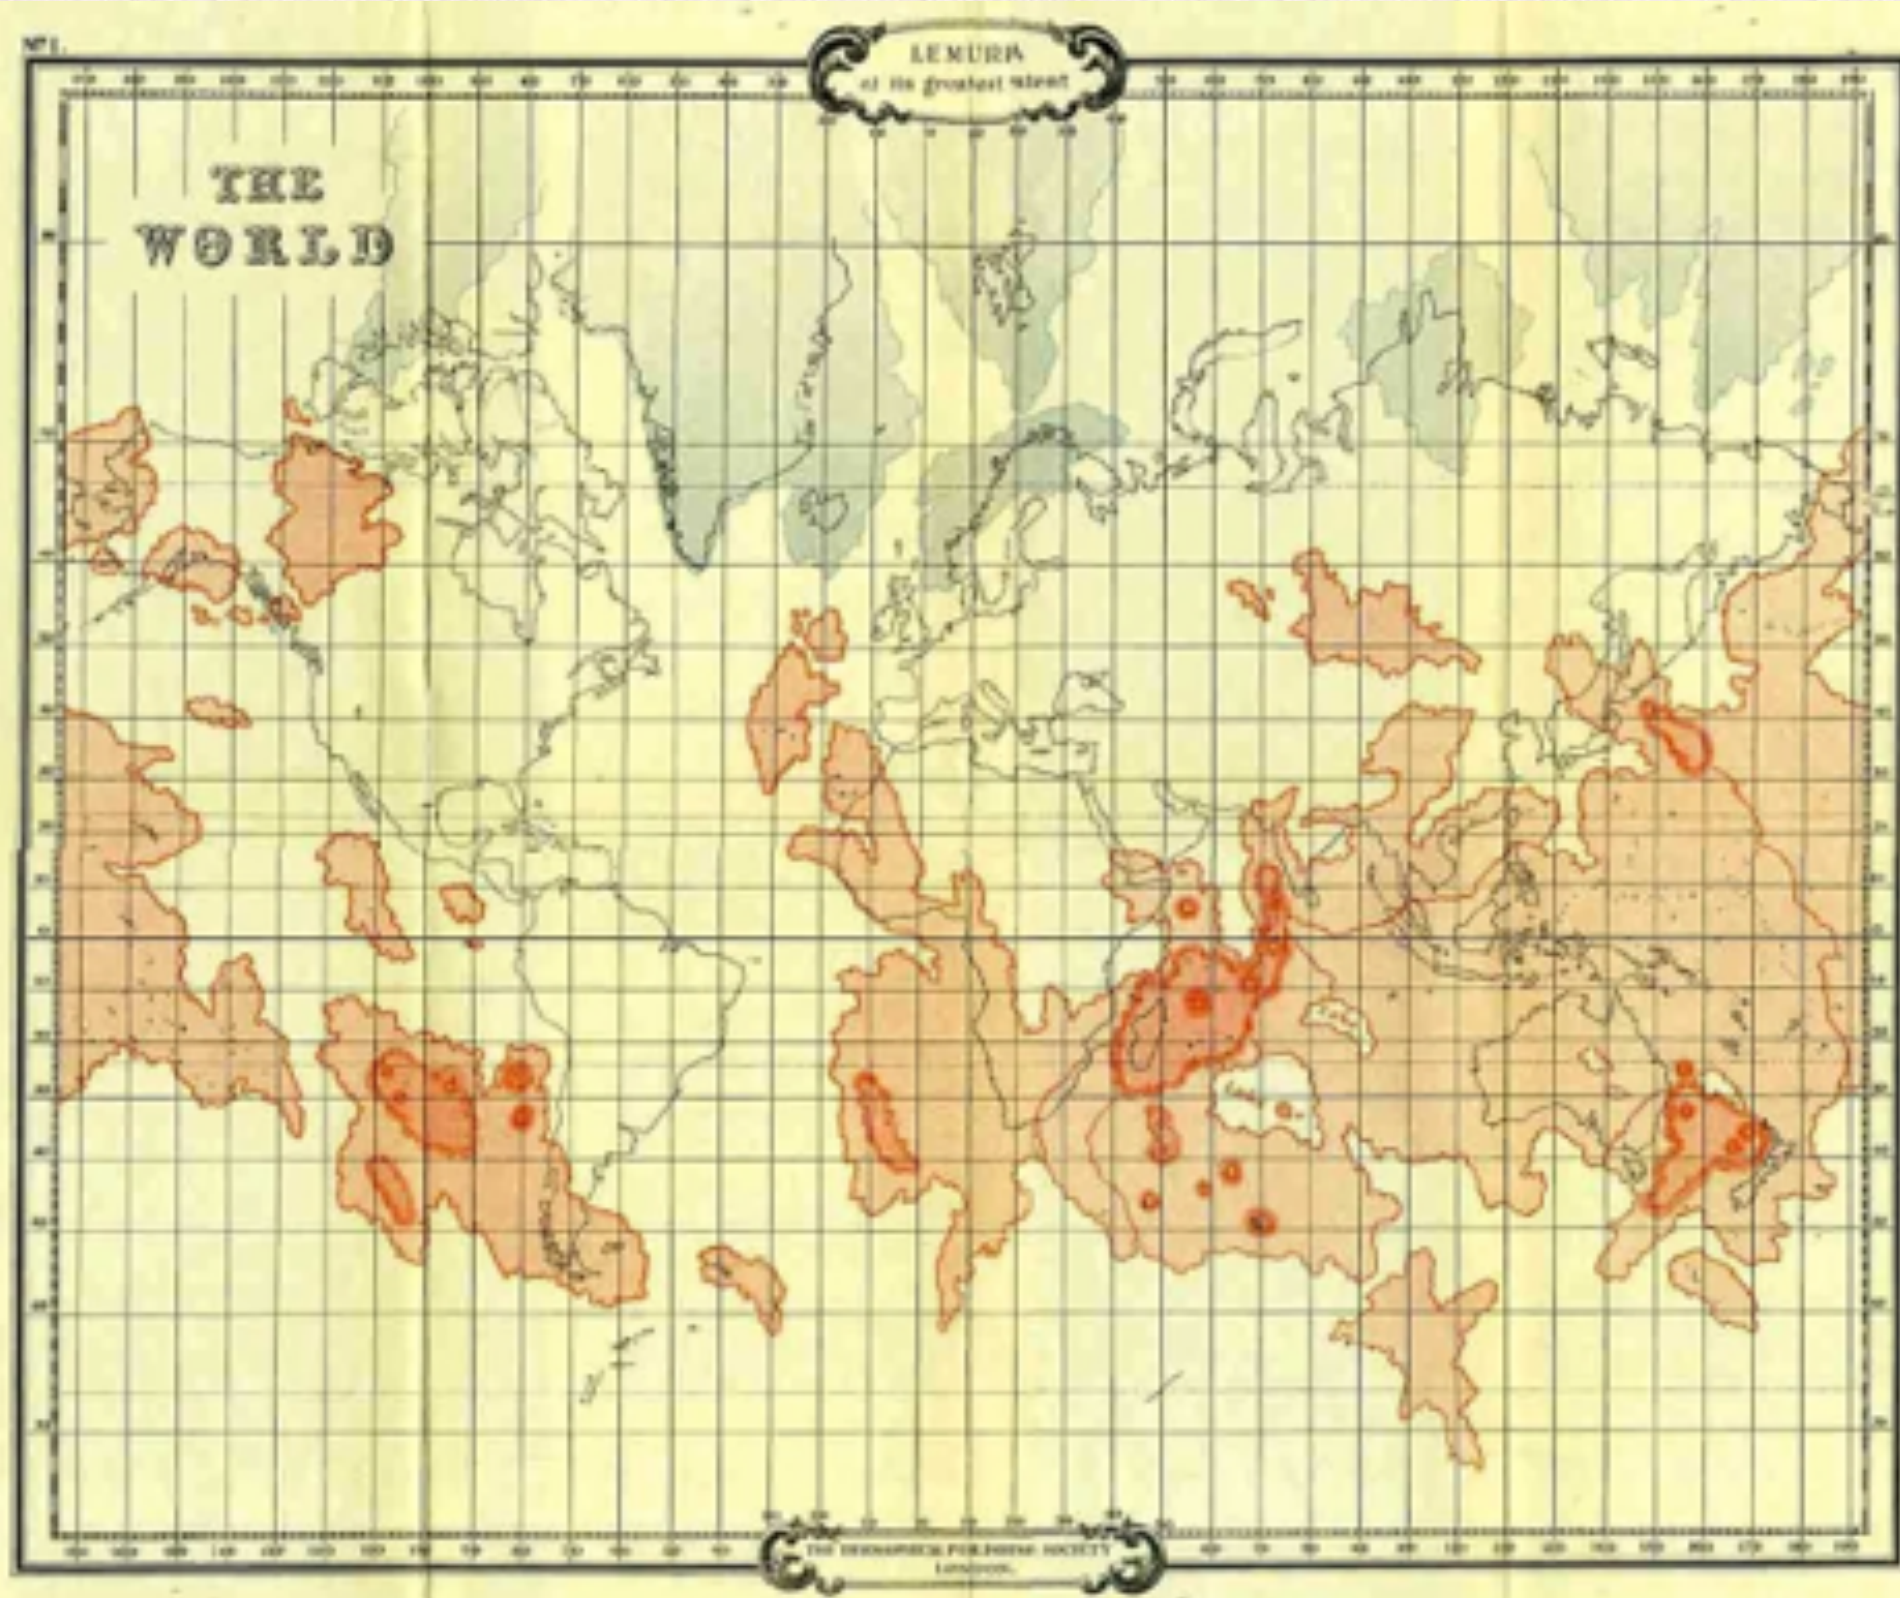

We have reached a very interesting point and it is this issue of glaciers. It seems incredible that in southern Europe and North Africa, had existed in other terrible times glaciations. In Spain, for example, it has been told, corresponding to the Silurian Period that there were tremendous glaciations; and this is demonstrated through all studies of Paleontology.

Meanwhile, no one could deny that today have been discovered, for example, in Siberia, and especially at the mouth of some rivers like the Obi and others, mummified corpses of antediluvian animals. This means that Siberia is so cold, in times of great heat was tropical, like Greenland, the Scandinavian Peninsula, Sweden and Norway to Iceland and all that horseshoe completely surrounds the North Pole.

What would have been hot in those regions? "Impossible!", I'd say anyone. And yes, paleontology has confirmed pretty interesting creatures have been discovered precisely in the mouths of the rivers that I quoted and this invites us all to reflect ...

During the time of Atlantis, the north and south poles were not where they are now. Then, the North, the Arctic Pole was located on the equator, at the point easternmost tip of Africa. And the Antarctic, the South Pole was located exactly on the same equator to the opposite, a specific place in the Pacific.

There are other tremendous changes in the face of the globe. True old maps are unknown to the sages of this era. In the secret crypts of Lamas, in the Himalayas, there are maps of ancient Earth maps that show that our world had another appearance in the past.

Think of Lemuria, that gigantic continent then located in the Indian Ocean. It was attached to Australia, because Australia is part of Lemuria, like all Oceania. The Arctic was located in the easternmost point on the equator in Africa. Everything was different, different ... completely different ...

By the time it came to pass a glacier of those terrible. This glaciation was projected precisely from the Arctic Pole, located in Africa, towards Arabia, that is, Southwest Asia. And also it covered completely, or almost completely Lemuria. The whole area was filled with ice, but failed to pass such glaciation the Mediterranean.

It is therefore interesting that there are times when our world Earth passes through such glaciations, the ice invades in certain areas, in which millions of creatures die. All that is really due to the tilt of Earth's axis relative to the obliquity of the ecliptic.

Man had to develop in different scenarios, and we must get to know what those scenarios are. How the America's continent appeared? How does Europe appeared? How does sank Lemuria? How Atlantis disappeared?

Lemuria was accepted by Mr. Darwin and there remains still in the bottom of the Indian Ocean. Through successive conferences, we will study all these scenarios where the human race has evolved ...

Obviously, the agencies have gone through various morphological changes in the different environments where have been unwrapped

If we say, for example, that the "intellectual animal" mistakenly called "Man", is ancestor to the famous mouse (which now speak both materialistic anthropologists), or better said the "runcho" (as they say the South American), thereby we would frankly falsifying the truth.

That huge, or "runcho" mouse South America, we know that originally comes from Plato's Atlantis, which existed long before Atlantis man existed. Then the man is before the famous mouse or runcho Atlante, as he is quoted now in these times.

If we say that the man originally comes from certain primates, and later hominids certain ancient Lemurian land, also we would be thereby falsifying the truth. Because before the apes existed long before they had appeared the much vaunted primates or hominids, the man was already here, already existed. Moreover, before the reproduction of the species will be made for cooperation, the man already existed. Man existed before the Lemuria was accepted by Mr. Darwin.

Obviously, we must recognize that the human race has been studied in form, we would say, shallow materialists by anthropologists, and has been since the Paleolithic times through the stages of the Eocene, Miocene and Pliocene; It is the oldest still Atlante and Lemur continents.

But it is necessary, I repeat, to continue studying the different scenarios of our world, to better understand the various processes of evolution and involution of the various human races.

For this moment, I want to say that we, the Gnostics are firm in our concepts, and if it gets us to choose between a Paracelsus, as the father of modern chemistry, or Haeckel, as creator of Sozuro famous mythical, frankly we resolve by the first: by the great sage Paracelsus.

My words here tonight.

Inverential Peace!

SECTION 2

QUESTIONS

questions from other talks on issues related

QUESTION: What was the origin of the division of the sexes?

Samael Aun Weor: The division of sexes had to be done because, divine entities, beings, needed necessarily be male or female separate vehicles for their own self-development and individual experience. That is the cause ...

QUESTION: Do you have any book documenting what you just said, at least in a way accessible to us? I do not know if I explain

Samael Aun Weor: I wrote a Christmas message, the 69, where I talked about all that ... 68-69 ... If anyone asks, I extend to you the "Message" of 1968-69, where I wrote about everything.

However, other authors have elucidated a lot about issues Anthropogenesis. I can particularly recommend the second vo-

lume of "THE SECRET DOCTRINE" entitled "ANTHROPOGENESIS" whose author is Master Helena Blavatsky Petronila. Also Rudolf STEINER, for example, in his "OCCULT SCIENCE TREATY" gives many lights on the subject.

I can talk to you extensively about this, due to the concrete fact that what I am explaining, I've lived. So I need not study to speak; I have lived and I have not extended the whole issue today, because we would take all night and would not manage to finish; or "thousand nights" I would have just explain to you the whole development of this Universe since it emerged from Chaos. In any case, I've lived and I know by direct experimentation.

QUESTIONS: Master, would it be correct to take the definition of the Elohim, as "emanations of the Absolute" going down vibration by projecting each other, so that when the end take shape, fumes condense in the form of electromagnetic vibration form what we think or call as "stuff"? What if Elohim are those who helped to form the Man God, since in the Bible, God said, "Let us make man"? And what he did not say only, said in plural: "Let us make man". You mean other characters or other forces mean?

Samael Aun Weor: Well first of all we must analyze the word "Elohim", right? "Elohim", in truth, is a feminine word with a pluralized male end (the "H" sound in the Spanish language, is pronounced as "J", so that its exact pronunciation is "Elohim"). If the word "Elohim" is pluralized, then we have the

Elohim as the Army of the Voice, formed by creatures MALE-FEMALE perfect.

And precisely VALENTIN founder of the Gnostic Order of Valentinianos, presented the same view: "The Elohim as perfect couples, emanating from AGNOSTOS THEOS", ie the Unknowable Divinity, the Seidad Unknowable, which it is the Absolute, or better said, the Absolute Abstract Space.

This space, obviously it is devoid of any kind of quality that is beyond all possible intellectual conception; It is empty and full at a time.

If we say that Agnostos Theos, the Absolute, is only an "empty" and nothing else, we would not give a precise indication; but if we say that the Agnostos Theos is emptiness and fullness while we can indicate precisely the essence of the Absolute.

Now, entering to the bottom of what is the Absolute, it is not possible by mere speculative reasoning, because it is beyond any possible speculation. But "yes they emanate in perfect couples (says Valentin), the Elohim" ... These emanations in perfect couples, as they come to build the Universe. They are the Cosmocreators: Perfect androgynous, the creators of the Universe.

As it is said: "Let us make man in our image and likeness", it is obvious that themselves, taking body, fell in Lemuria, as they descended in the Polar Era and the Hiperbórea, lived as Perfect Men, as androgynous ...

In the Polar Epoch, simply Androgynes that reproduced through sex fissiparous; in the Hyperborean Epoch as androgynous reproduced by the system budding, and the Lemurian Epoch as hermaphrodites that reproduced with the system of budding, ie Man himself made in the "image and likeness" of them, as in the background themselves were man.

They were removed after the picture of the Universe, it's true! They left these forms of "DISCARDED MATERIALS" (useless because for them, divided into opposite sexes) to the upper elementary from the Animal Kingdom.

So, this humanity, these "bipedal brained" or "three-centered" were the elementary higher animals who occupied vehicles or "discarded forms" of the Elohim. They left, but they left the bodies (divided into opposite sexes) to be occupied by the

Upper Elementary and occupied them; and as the Elementals superiors were occupying it, they went away, until they left ...

Some fell Elohim, it's true! And that is "the angelic rebellion". They not all fell. But many fell; and that is written in all Mythologies: "The Revolt of the Angels", "The Fall," that is part of all the old religions of antiquity ... So Perfect Man Hermaphrodite, was made in the "image and likeness" of God ...

Now, putting us in an aspect of higher order, the book of Genesis is part of Alchemy. While it is true that by Genesis unfolded and developed the whole picture of the universe, it is also true that the Alchemist must work with the Genesis and be re-made in the "image and likeness" of the Elohim, the instant it reaches the "sixth day of Creation" ...

One is the "image and likeness" of God when it has been "swallowed by the snake" and when to turn, it has been "devoured" by the eagle. When one has become a QUETZAL-CÓATL, in the same Male-Female, then an Elohim is again done, a perfect man has become the "image and likeness" of "them and they", the She, god and goddess at once.

QUESTION: A question, Master: all human beings fell, or there are human beings that are preserved with their original hierarchy?

Samael Aun Weor: Well, there are some REAL MEN, now, that did not fall and that remain normal ...

QUESTION: Since that time?

Samael Aun Weor: Yes; not all people are visible to the inhabitants of the three-dimensional world of Euclid. In the Vertical Fourth of our planet Earth, there are other humanities of flesh and blood that are normal, they never developed the abominable "Kundartiguador Body" and continue playing by Kriyasakti. So, they are these abnormal living in the three dimensional world of Euclid, which are commonly called "Earthlings".

CYNOCEPHALUS

Cynocephalus: literally means "dog's head". It applies to various mythological characters based on real people, such as "Papio cynocephalus" sacred baboon of Egypt with dog's face.

In the theory of evolution of species they are called catarrhines to Old World monkeys, as opposed to the new world monkeys. By extension those baboons are primates catarrhines having the elongated head, like a dog.

DINOSAURS AND MEN

Dr. C. N. Dougherty discovered in 1971 in the Valley of the Giants (Texas) Saurios numerous traces of various species, along with other human feet large, in the same geological stratum.

This and other similar findings give reason to Blavatsky, the Vedas and many other ancient traditions.

EZRA

Ezra was a scribe very studious and faithful follower of the Law of Moses who used to teach the Jewish people who had remained in exile. Ezra organized religious services and laid the foundations of religiosity and love of the Law that will last in the Jewish people until the coming of the Messiah.

Ezra is a Biblical book of the Old Testament in the Christian Bible is located between II Chronicles and Nehemiah. Along with the Book of Nehemiah, they represent the final chapter in the historical narrative of the Hebrew Bible.

GEOLOGICAS ERAS

Geological Eras are a definition of the stages that have been identified based on geological and fossil record of the evolution of the planet and the life it has had over time.
The current science defines only four geological eras:

the Archean (4500-590), also called Pre-Cambrian
the Paleozoic Era (590-245)
the Mesozoic Era (245 to 65)
and Cenozoic Era (65-0)

Brief overview of the geological eras:

ERA	PERIOD	DURATION	CHARACTERISTICS	INTERVAL	EVENTS
PALEOZOIC					
or Primary Era	Cambrian	590	marine invertebrates and		
	(85 Millions years)	505	first jawless fish		
(apogee of fish and amphibians, emergence of the reptiles)	Ordovician	505	apogee of		
	(67 Millions years)	438	jawless fish		third glaciation
	Silurian	438	first fish		
	(30 Millions years)	408	bones and shelled animals		
	Devonian	408	apogee of fish and		
	(58 Millions years)	360	extinction of many amphibians		
	Carboniferous	360	disappearance of fish		
	(70 Millions years)	290	jawless and appearance of amphibians		fourth glaciation
	Permian	290	apogee of amphibians and		
	(45 Millions years)	245	appearance of reptiles		
MESOZOIC	Triassic	245	Diversification		
or Secondary Era	(37 Millions years)	208	of reptiles		
(reptiles Era, emergence of mammals and birds)	Jurassic	208	Apogee		
	(70 Millions years)	138	the reptiles		
	cretaceous	138	extinction of		
	(73 Millions years)	65	large reptiles		
CENOZOIC					
tertiary Era	tertiary	65	Paleocene (10 Millions years)	65 - 55	Birds and mammals predominant
	(63 Millions years)		Eocene (17 Millions years)	55 - 38	arise primates
(extinction of Dinosaurs, expansion mammals and appearance of man)			Oligocene (13 Millions years)	38 - 25	arise herbivores
			Miocene(20 Millions years)	25 - 5	arise anthropoids
		2	Pliocene (3 Millions years)	5 - 2	arise hominids
					Paleolithic or Stone Age
	quaternary	2	Pleistocene (1.9 Millions years)	2 - 100 thousand years	Quaternary glaciations
	(2 Millions years)	0.1	Holocene (100 000 years)	100 to to present	Homo sapiens emerges emergence of civilization

MONERA

Monera is a kingdom of the classification of living things for some classification systems, which groups prokaryotic organisms, still being used in many manuals and textbooks. The current term is equivalent prokaryote and is defined as the kingdom of microscopic organisms that inhabit all environments and are formed by a single cell without defined nucleus.

The term Monera has a long history that has changed its meaning, although always set pointing to its etymology, the Greek μονήρης, moneres, simple, reference to the simplest microorganisms.

The term was first used in this way by Ernst Haeckel in 1866, because it was the first to attempt to establish a phylogenetic hypothesis of biodiversity adjusted to the then young and triumphant theory of evolution.

He divided organisms into three main branches, Plantae, Animalia and Protista, gathering in the latter to the "primitive" forms that did not seem to show a specific relationship with plants and animals "superior". Haeckel Moneras placed in the trunk of the tree of life, within Protista, which distinguished a sub-branch where, similar to the first living forms simpler lines, which he called so, Moneras be found.

MOUSE AS ANNCESTOR

For decades it has it has included these animals as ancestors of humanity today. In 2013 a team of scientists discovered a small animal the size of a squirrel, insectivore, which lived 65 million years ago and could be the ancestor of us all placental mammals.

This small animal could be the ancestor of mice, elephants, tigers, bears, whales, bats and humans. It was the size of a modern squirrel feeding on insects. It is estimated that this animal lived between 200,000 and 400,000 years after the event that caused the extinction of dinosaurs 65 million years ago.

NEO PITHECUS

Pithecus name formerly used by zoologists to various groups of apes and monkeys, so pithecoïd NEO expression is to refer ape-like beings.

The use of that word Pithecus gave rise to the term Pithecanthropus, which also means anthropopithecus, however both terms differ in their conception since according to the first position of its etymological root can be:

Anthropopithecus: monkey traits of man.

Pitecantropo: man with apelike features.

In most currently used is anthropopithecus: Mammal hominid that lived in the Pleistocene, which some scientific theories considered the missing link between ape and man: anthropopithecus fossil bones were found on the island of Java.

REVOLUTION THE AXES OF THE EARTH

The world's axis is the imaginary line around which Earth spins on its rotational movement. The ends of this axis are the North and South geographic poles. It is common knowledge that this axis is tilted relative to the plane of Earth's orbit, and this inclination is responsible for the stations on Earth.

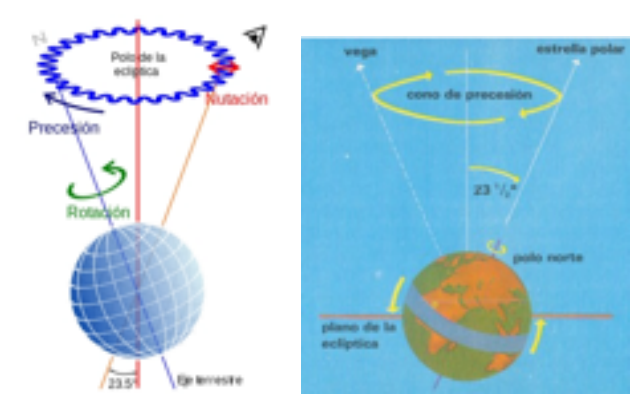

The tilt of the Earth on the plane of its orbit, is also called obliquity of the ecliptic.

The land is giving "little nods" while spinning like a top. It has been found that the obliquity of the ecliptic is slightly variable due to oscillation of the rotation of the Earth through its axis, by the presence of the moon, this oscillatory motion is called nutation and has a period of almost 19 years.

In addition, in the motion of the Earth around the Sun, the extension of the axis of the world to the celestial sphere is not always directed at the same point in the sky. Today it is doing to the polar star but this point varies gradually so that goes in a circle. almost 26,000 years are required for this circle is complete. This movement takes the Earth's axis with a period of 25,800 years is called precession.

There is no consensus on the causes of ice ages only known that several factors are important in form and origin: the composition of the atmosphere; changes in Earth's orbit around the Sun, called Milankovitch cycles; and possibly the Sun's orbit around its gravitational center.

The geological history of the planet reveals that this whole complicated pattern of movement is not fixed in their benchmarks, but has had changes of various kinds.

SOZURO

Haeckel produced a string composed of twenty links, covering the ancestors invertebrates and vertebrates progenitors of man.

Start at the Moneron, composed coreless mass of protoplasm, then as second link AMOEBA, which was, according to him, a mononuclear organism, and so on increasingly complex.

In that series the SOZUROS correspond to the link number 14 and were conceived by him as amphibian metamorphosis trailed the guts to reach adulthood, as with the frogs that live today.

The number 19 is the catarrhines MONKEYS, 20 the great apes like the orangutan and gorilla and his famous Pithecanthropus 21, a Man-Monkey who have not yet had the power to speak.
